Skills: Strategic planning • Program initiatives • Project management • Process improvement • Operational efficiency • Stakeholder communication • Public service • Implementation planning • Documentation • Data collection • Analysis • Change management
Cloud & DevOps: AWS Services • CI/CD Pipelines • Infrastructure as Code (IaC) • Cloud infrastructure • Cloud Services • Codex • Claude Code • AI fluency
Public Service/Communication: Customer service • Public-sector operations • Cross-functional collaboration • Clear technical communication • Field operations support • Effective working relationships • Documentation and reporting • CJIS clearance • Public-facing communication • Presentations • Vendor coordination • Staff training • Policy/procedure development

EXPERIENCE

Seasonal Mountain Park Ranger - City and County of Denver **Mar. 2025 – Feb. 2026**

- Denver, Colorado*
- Served as a public-facing representative of Denver Mountain Parks, supporting daily operations, visitor safety, public communication and resource protection.
 - Supervised natural resource management teams to improve the status of our parks.
 - Ideated and implemented a variety of systems and ideas to improve park safety and efficiency.
 - Made suggestions to senior leadership to develop principles the program could adopt, then took lead in that initiative.
 - Wrote and lectured on various natural educational topics to park visitors on ranger-led tours.
 - Nurtured trusting and effective working relationships with coworkers, supervisors, partner departments, and park visitors.
 - Applied sound judgement, professionalism, and policy awareness in a public-sector environment.
 - Acted as the safety and enforcement liaison between local police municipalities and the Denver Mountain Park system.

Software Development Engineer – Amazon Web Services - Health AI **Aug. 2022 - Apr. 2024**

- Seattle, Washington*
- Coordinated with engineering, product, operations and leadership stakeholders to support product planning and implementation across cloud-based healthcare tech services.
 - Contributed to long-term strategic planning for product goals and customer outreach.
 - Supported cloud-based systems which required high levels of robustness, reliability, and data integrity.
 - Troubleshot and resolved complicated technical issues across different teams and institutions.
 - Contributed to customer-centric solutions when dealing with sensitive data.
 - Maintained security standards that maintained industry best practices.
 - Practiced in cross-team functional such as, daily stand-ups, sprint planning, retrospectives and general task tracking.
 - Evaluated and tested systems to ensure proper functioning according to product specifications and team goals.
 - Conducted annual performance reviews of team members.
 - Deep-dive into technical issues via logs, metrics, internal documentation, and collaborative troubleshooting
 - Professional documentation on technical issues, process improvements, and general team playbook for recurring issues
 - Responded to support requests and resolved and documented in our ticketing system
 - Assisted end-users and communicated effectively with non-technical users

Instructional Assistant | The University of Texas at El Paso **Summer of 2021**

- El Paso, Texas*
- Assisted in teaching Data Structures to a class of 40+ students.
 - Provided technical support and guidance, ensuring student success.
 - Fostered an engaging and supportive learning environment.

EDUCATION

The University of Texas at El Paso **May 2022**
Bachelor of Science in Computer Science, Minor in Commercial Music **GPA: 3.55/4.00**

END-TO-END PROJECTS

- Vehicle Inspection Automation - Denver Mountain Parks** **Aug. 2025 – Mar. 2026**
- Recognized gaps in efficiency and ranger accountability and took the initiative to develop solutions to outdated processes.
 - Collaborated with senior leadership to design a Product Requirements Document (PRD) for a mobile app to streamline Park Rangers' vehicle inspection process.
 - Developed and prototyped the entirety of the app (front-end & back-end).
